DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/09/2007 has been entered.

Claims Allowed

The following is an examiner's statement of reasons for allowance:

A process for the activation of a supported catalyst for the selective hydrodesulfurization of a naphtha feedstock comprising steps (a) to (c) as claimed in claim 1, wherein catalyst is heated in the presence of an olefinic naphtha is not taught or fairly suggested in the prior art. The prior art teaches catalyst heating in presence of a virgin naphtha. Prior art teaches that a typical virgin naphtha is substantially olefin-free and the claimed invention uses cat naphtha containing 5 to 50 wt% olefins.
